PARTS LIST

Refer to the parts list on the itemized invoice delivered with your building.

All parts are stenciled on the inside of the channel, purlin, girts and rafters. Example of this below:
TYPES OF SCREWS

- **Screw**
  - "Large Head"
  - For attaching sheet metal to purlin
  - Lap Strap "on the bottom"

- **TEK Screw**
  - For attaching sheet metal to purlin
  - Length: 1 ¼"

- **Lap TEK Screw**
  - For attaching sheet metal to sheet metal
  - Length: ⅞"

**NOTE:** Make sure to use TEK screws to attach sheets to purlins, lap TEK screws to attach sheets to sheets.
BASE LAYOUT (BC-1 AND BP-1)

**NOTE:** Leading and trailing edge of channels are overbent for a tight fit. Spread apart as needed to nest the purlin into the channel.

**BASE LAYOUT (BC-1 AND BP-1)**

**STEP 1**
Insert BP-1 into BC-1

**STEP 2**
Add MKB-1 (Galvanized MKB-2) to top of BP-1 into BC-1

**STEP 3**

**Leveling and proper blocking is critical for the base layout.**

**Triangles are for door centering.**
MAKE SURE THE ASSEMBLY IS SQUARE

NOTE: Mueller recommends the building be placed on leveling blocks (not included) to support the base channel and purlins. Mueller also recommends the building be anchored to the ground or foundation. The method of anchor is at the owner’s discretion.

Make sure the assembly is square. Assembly is square when the corner to corner measurements are equal.
ERECTING COLUMNS (C-1)

Attach column to MKB-1 (Galvanized MKB-2) clip using 1/2”x1” Fin Head Bolts.

**HINT:** Add clips to top of columns before standing up.
RAFTERS (R-1)
Bolts should remain loose until EC-1 is installed.

Place only inside bolt as shown.
EAVE CHANNEL (EC-1)
Tighten bolts after EC-1 is installed.
MAKE SURE THE ASSEMBLY IS SQUARE AND LEVEL

Make sure the assembly is square. Assembly is square when the corner to corner measurements are equal. Use temporary bracing (not included) to hold assembly square if required.
ROOF PURLIN

Open side of RP-1 faces to center of building.
DOOR AND DOOR TRIM

Notch and bend trim as shown.

TOP VIEW

Door Jamb
Door
J Trim
TEK Screw
MID-GIRTS
MG-1, MG-2 AND MG-3

NOTE: Bolt to inside of column leg.

To attach MG-3, use TEK screws to go through door trim, door frame and girt.
ADD WINDOW

Start sheet 1" in past steel line. Sheet 1" above bottom of base channel.

NOTE: Sheets below window will need to be field cut for window assembly from 3'8" panels.

Install one full sheet, then partial sheet. Insert window and flap flush to sheet. Add drip edge window trim when installing eave trim.

See installation instructions included with the window packaging.
**SHEETING SCREW PLACEMENT**

**WALL SHEETS**

- Lap TEK Screw
- Lap Strap “on the bottom”

**ROOF SHEETS**

- Lap TEK Screw
- Lap Strap “on the bottom”

**NOTE:** Make sure to use TEK screws to attach sheets to purlins, lap TEK screws to attach sheets to sheets.
SHEETING SIDEWALL

NOTE: Start sheets 1" in from corner channel and start sheet 1" above the bottom of the base channel.
SHEETING ENDWALL

NOTE: Start sheets 1" in from corner channel and start sheet 1" above the bottom of the base purlin.
SHEETING

NOTE: Make sure the frame is plumb and level, and tighten all bolts prior to sheeting. Repeat for each wall.

For side with door, start sheets flush with J-trim on both sides of the door.

NOTE: For 9'-4" end, start sheet 1" in from corner.
CORNER TRIM

Lap Strap
"on the bottom"

Use TEK screws to attach to frame
BACK SIDE WALL

Roof to wall sheet alignment.
Align major ribs from wall to major rib on roof.

NOTE: Make sure panels remain square during installation.
SHEETING THE ROOF

Align roof sheets with wall sheets.

CAUTION: Use scaffold boards (not included) when installing roof panel sheets/trim.

NOTE: Use TEK screws at the purlins.

Use Lap TEK screws every 20" vertically.
ROOFING TRIM DETAILS

CAUTION: Use scaffold boards (not included) for support while installing roof sheets and trim.

Inside rake trim goes behind outside rake trim.
RIDGE ROLL INSTALLATION

CAUTION: Use scaffold boards (not included) for support while installing roof sheets and trim.

HINT: Screw corner of ridge roll and middle first to maintain pitch. Install remainder of screws.

Install lap screws on ridge roll every 12 inches.

Foam Block (under Ridge Roll)
Ridge Roll
Outside Closure
Lap TEK Screw
Roof Panel

Foam Block closes the gap in between the closures.
TOTAL BUILDING MEASUREMENTS

- **12'4"**
- **9'7"**
- **7'1"**
- **7'7"**
- **9'7"**
- **12'4"**
