COMPLEX CAPABILITIES

Our team of expert engineers behind every Mueller building project can design complex, multi-functional facilities, such as churches, schools, manufacturing and commercial businesses, that require strict adherence to predetermination plans and specifications. These larger, more complex projects might include buildings that:

- Have a clear span of up to 150′
- Require cranes
- Incorporate a mezzanine in the design
- Include multiple, interconnecting structures

CONTRACTOR SUPPORT

- **Contractor Information List:** Inclusion as a potential installer option for Mueller customers starting new projects
- **In-House Engineering:** Engineered to project specifications
- **Site Visit Service:** Inspection and measurement service for residential metal roofing (NOTE: Not available in all areas.)
- **On-Site Delivery:** Convenient delivery and fork lift unloading
- **After-Sale Support:** Assistance and ongoing support after the sale
